Founding Engineer @Horizon17 | CSE'25@IIITN | MERN | Next.js | JavaScript/TypeScript | DSA Enthusiast
Gurugram, Haryana, India

Summary

I am a passionate and dedicated Full Stack Developer with experience in building scalable, responsive, and user-friendly web applications. With expertise in React.js, Node.js, Redux, Tailwind CSS, and MongoDB, I specialize in creating modern and high-performance applications. I have worked on various projects, including a Course Enrollment System, an interactive SNS Website, Rent Buddy (an online furniture rental platform), and an agriculture startup website.

My skills extend to developing interactive UI/UX designs, building robust backend solutions, and implementing real-time data synchronization using Socket.io. I have also worked on internationalization, ensuring seamless multi-language support in web applications. Currently, I am expanding my knowledge in Redux Toolkit, advanced JavaScript, and Electron.js to build desktop applications.

I am always eager to learn, solve complex challenges, and refine my skills to stay ahead in the tech industry. Open to new opportunities, collaborations, and tech discussions, I believe in creating innovative solutions that make a difference. Let's connect and build something amazing together!
